

PERMANENT MAKEUP EYELINER AFTERCARE

DAYS 1-2:

- Immediate Aftercare: Avoid touching, rubbing, or washing the eye area.
- If needed, gently blot with a clean tissue to remove excess fluid.
- Do not apply any ointments, creams, or makeup near the eyes.
- Avoid for 7-10 Days No eye makeup, mascara, eyelash serums, or lash extensions.
- Avoid sweating, steam, saunas, swimming, and sun exposure.
- Do not rub or scratch the eyelid area - this can cause pigment loss.
- Swelling & Sensitivity - Mild swelling or redness is normal during the first 24-48 hours.
- Apply a ****cold compress**** (covered in clean gauze) gently over closed eyes if needed.
- Avoid antihistamines unless prescribed.

SCABBING AND PEELING:

- Expect light flaking around day 3-5.
- Do not pick at flakes.
- Allow scabs to fall off naturally to ensure proper healing.
- Healing Timeline.

DAYS 1-3:

- Eyeliner appears bold and slightly swollen.

WEEKS 2-6:

- Peeling begins, pigment may look patchy or faded temporarily.
- Weeks 2-6: Colour softens and stabilises to final tone.
- Contact Lens Users - Do not wear contact lenses for the first 48 hours.
- Use glasses during the initial healing period to avoid irritation.
- Schedule a touch-up appointment within 6-8 weeks for best results.

WEEKS 1-2:

- Immediate Aftercare: Gently blot the area with a damp cotton pad every hour until bedtime.
- Avoid water and steam exposure. No hot showers directly on the area.
- Apply a thin layer of healing ointment if advised by your artist.
- Avoid for 7-10 Days.
- No makeup on or around the brows.
- No swimming, saunas, steam rooms, or direct sun exposure.
- Do not scratch, pick, or peel the scabs.
- Scabbing and Peeling
- Peeling may begin around day 3-5.
- Do not interfere with it.
- Allow all scabs to fall off naturally.
- Moisturising Protocol.
- After day 3, apply a thin layer of ointment if tight or itchy.
- Do not over-apply - less is more.
